

The Digital Transformation Landscape

An insights dashboard for the financial inclusion ecosystem.

Benchmark Digital, Data and AI maturity across Financial Service Providers and identify priority areas for investment.

Digital transformation is moving fast, but progress varies across institutions. The DT4I Insights Dashboard turns Digital, Data and AI maturity assessments into ecosystem insights, helping identify gaps and opportunities for targeted support.

What the dashboard shows

See where Financial Service Providers stand today across Digital, Data and AI maturity.

Explore insights by:

- Country and Region
- Institution type
- Digital, Data and AI assessment results
- Maturity stage (Emerging, Developing, Advanced, Leading)

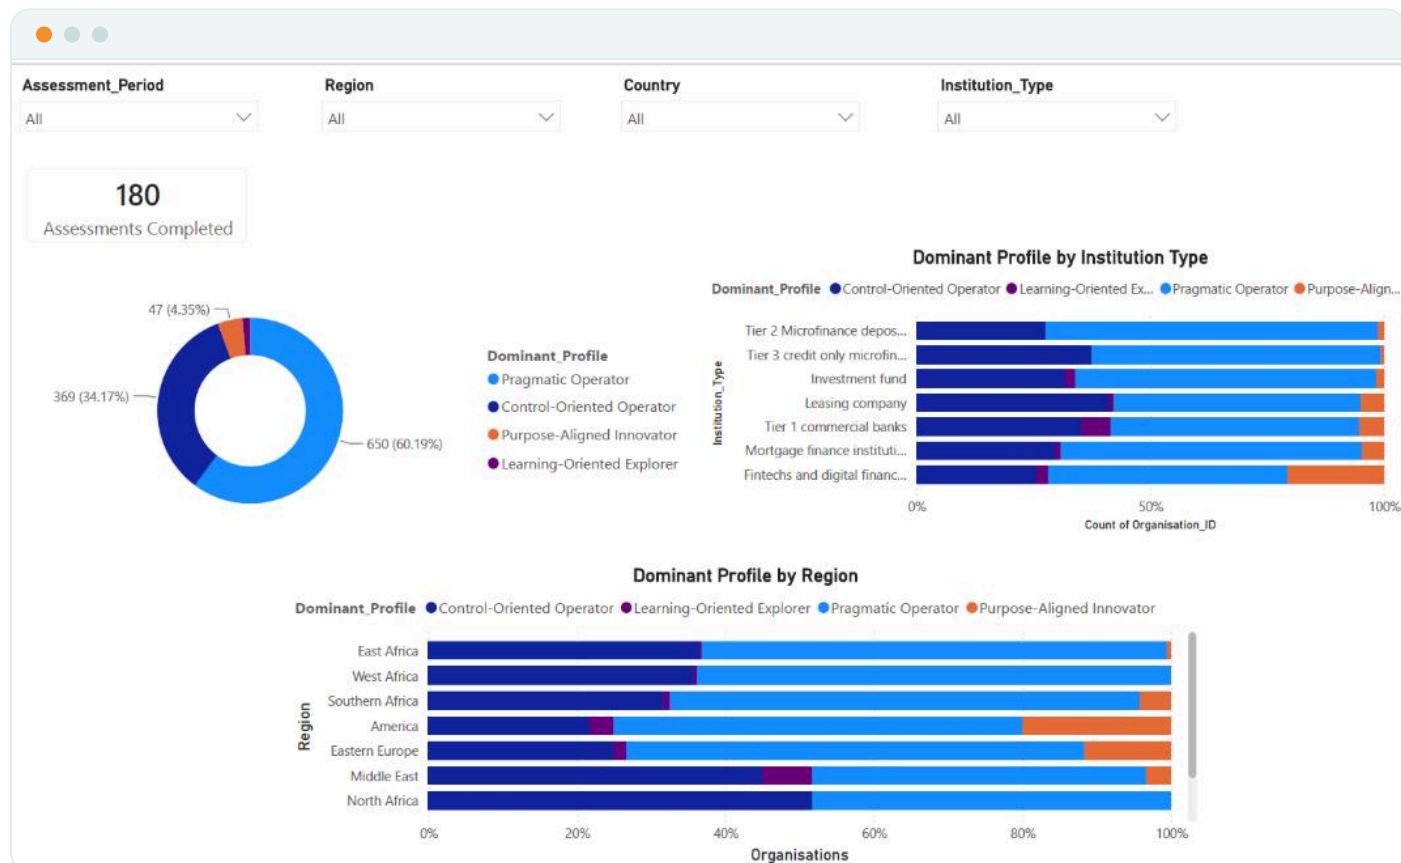

Maturity distribution dashboard showing how financial institutions are positioned across different maturity levels and assessment areas.

You can go deeper and explore benchmarks by each dimension.

AI maturity snapshot showing the distribution of institutional capabilities across AI readiness dimensions.

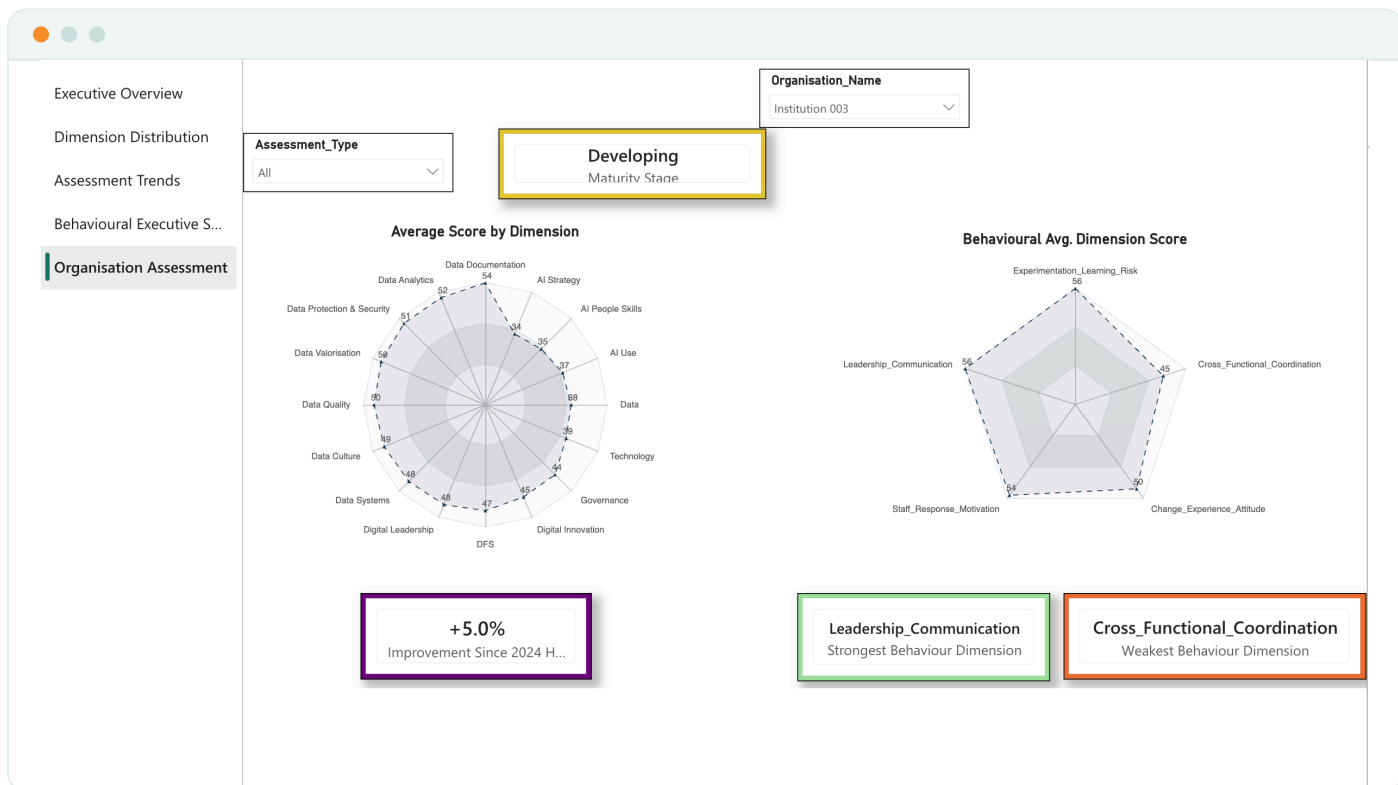

Learn about different organisation profiles in your region, country or globally.

Organisational profile displaying dominant transformation profiles across institutions, regions, and market segments.

Digital maturity trends showing changes in institutional readiness over time, including progress by maturity stage, institution type, and key transformation dimensions.

The organisation assessment 360 view - Institution-level maturity snapshot providing an overview of an organisation's Digital, Data, and AI maturity status, along with the Organisation behaviour profile.
